Dear Dr Tarling

I am pleased to write this letter of reference for Limina Education Services, who we have partnered with to present the Mathematics Problem Solving Course online since 2022.

Limina's Learner Management Platform (LMS) is used to register the students and the course content, including the assessment, is hosted on their platform. The course provides teachers with various problems to solve over 6 weekly units, in a flipped classroom mode. Each unit provides teachers with knowledge and understanding of the problem-solving process.

Since 2022 we have trained 1 360 primary and high school teachers and have received positive feedback about the course and the commitment of the Limina team who goes an extra mile to assist teachers on an on-going basis ensuring that they complete the course.

We look forward to our continued collaboration to improve mathematics education.

Sincerely,

Ellie Olivier
General Manager
South African Mathematics Foundation
